QUARTZFORMS

MADE IN GERMANY

Destination

Quartzforms

The group was born in 1981, thanks to the passion and artisan expertise of its founder, Domenico Luigi Scapin. Quartz agglomerate arrived on the market in the early nineties: an utterly innovative material with a natural appearance and unparalleled resistance, guaranteeing exceptional performance. We immediately recognised its potential, not least in interior design, and undertook to process and market the new material.

In 2010 we launched Quartzforms S.p.A. and acquired a Bretonstone® production facility in Germany, renowned for its excellent compliance with the most stringent safety and environmental standards. Today we offer the public, designers and architects the very best engineered stone, the result of our dedication, creativity and experience.

Because the future lies in our roots.

***A group's success is determined
by the harmony and synergy
of all those involved.***

*Il successo di un Gruppo dipende
dall'armonia e dalla sinergia di tutti
i soggetti coinvolti.*

*Der Erfolg einer Gruppe hängt
von der Harmonie und der Synergie
aller beteiligten Personen ab.*

Die Gruppe wurde 1981 geboren dank der Handwerkskunst und Leidenschaft ihres Gründers Domenico Luigi Scapin. Quarzkomposit kam Anfang der neunziger Jahre auf den Markt: Es handelt sich um ein absolut innovatives Material mit natürlicher Ausstrahlung, das über unvergleichliche Beständigkeitseigenschaften verfügt und daher außerordentlichen Ansprüchen genügen kann. Wir haben das Potential, auch im Einrichtungsbereich, sofort erkannt und uns die Transformation und Vermarktung zur Aufgabe gemacht. Im Jahr 2010 haben wir durch den Erwerb einer Bretonstone®-Produktionsstätte in Deutschland Quartzforms S.p.A. gegründet, die sich durch strikte Einhaltung von Umwelt- und Sicherheitsstandards auszeichnet. Heute bieten wir Privatkundschaft, Architekten und Designern den optimalen Engineered Stone, entstanden aus unserem Engagement, unserer Kreativität und unserer Erfahrung. Denn die Zukunft liegt in unseren Wurzeln begründet.

Il gruppo nasce nel 1981 grazie alle competenze artigianali e alla passione di Domenico Luigi Scapin, il fondatore. L'agglomerato di quarzo compare sul mercato nei primi anni novanta: è un materiale del tutto innovativo, di effetto naturale, dotato di ineguagliabili caratteristiche di resistenza e pertanto capace di garantire elevatissime prestazioni. Ne abbiamo subito intuito le potenzialità, anche nell'ambito dell'arredamento, e ci siamo assunti l'impegno di trasformarlo e commercializzarlo. Nel 2010 abbiamo creato Quartzforms S.p.A. acquisendo in Germania un impianto produttivo Bretonstone® contraddistinto dalla massima adesione ai più severi standard ecologici e di sicurezza. Oggi offriamo al pubblico, ai progettisti e ai designer la migliore engineered stone, nata dalla nostra dedizione, dalla nostra creatività e dalla nostra esperienza. Perché il futuro è nelle nostre radici.

Back to the roots

After our dreamlike journey through vast expanses of stars, we have rediscovered and enhanced our kaleidoscope of multiform textures offered by the environment around us, so rich in light, depth and life. An ever-changing, endless creative range is reflected in this new collection of expressive, delicately textured luminous slabs inspired by nature and its spontaneous inspirations.

Nach unserer traumhaften Reise in die unendlichen Weiten der Sterne haben wir das Kaleidoskop an Texturen zahlreicher Formen neu entdeckt und erschlossen, das uns unsere Umgebung bietet und das so reich an Licht, Tiefe und Leben ist. Eine unerschöpfliche kreative Palette in ständiger Verwandlung, die in dieser neuen Kollektion von zart plastischen, leuchtenden und ausdrucksstarken Platten Gestalt annimmt, die sich an die Natur und ihren spontanen Zauber anlehnen.

Dopo il nostro onirico viaggio nelle immense distese stellari, abbiamo riscoperto e valorizzato il caleidoscopio di multiformi texture offerto dall'ambiente che ci circonda, così ricco di luce, profondità e vita. Una inesauribile tavolozza creativa in perenne trasformazione, espressa in questa nuova collezione di lastre delicatamente materiche, luminose, espressive, ispirate dalla natura e dalle sue spontanee suggestioni.

Dimension: 320 x 155 cm (126" x 61")
Thickness: 2 cm - 3 cm (3/4" - 1 1/4")

Colours and brightness of printed reproductions are indicative.
The slab simulates natural stone so, some changes are possible in the final product.

SUGHERO

the work of time

Cork is obtained from an oak tree that is a quarter of a century old. It takes another nine years for a new layer of bark to form. This slow and patient work of nature has inspired a quartz agglomerate slab scattered with subtle warm veins of varying intensity.

Kork wird aus einer ein Vierteljahrhundert alten Eiche gewonnen. Danach vergehen weitere neun Jahre, bis sich eine neue Rindenschicht gebildet hat. Ein langsames und geduldiges Werk der Natur, das zu einer von zarten und warmen Äderungen unterschiedlicher Intensität überzogenen Quarz-Agglomerat-Platte inspiriert hat.

Il sughero si ricava da una quercia che ha compiuto un quarto di secolo; trascorreranno poi altri nove anni affinché si formi un nuovo strato di corteccia. Una lenta e paziente opera della natura, che ha ispirato una lastra in agglomerato di quarzo cosparsa di tenui e calde venature di variegata intensità.

BETULLA

light effects

The bark of the birch tree stands out for its uniform whitish background scattered with irregular bluish-grey veins that branch out at its knots. An evocative and unmistakable pattern is created, which we have recreated in this elegant and versatile slab that brings new luminosity to all contexts.

Die Rinde der Birke zeichnet sich durch ihre von unregelmäßigen grau-bläulichen Äderungen durchzogene weiße und gleichmäßige Grundfarbe aus, die sich an den Knoten verästeln und ein eindrucksvolles und unverwechselbares Muster erzeugen, an das wir uns mit dieser vielseitigen und eleganten Platte angelehnt haben, die in der Lage ist, den Umgebungen ein neues Licht zu verleihen.

La corteccia della betulla si distingue per il fondo biancastro e omogeneo, cosparso di irregolari venature grigio bluestre che si diramano in corrispondenza delle nodosità, creando un suggestivo e inconfondibile pattern che abbiamo rievocato in questa lastra versatile ed elegante, capace di conferire agli ambienti una nuova luminosità.

GARRIGUE

Unspoilt colours

Garrigue is the name given to wasteland that is home to low, thorny and inconspicuous vegetation that grows in grey-green patches interspersed with dry areas. When viewed from a panoramic perspective, an unexpected, fragmented and mimetic texture emerges rich in nuances and chiaroscuro effects. These are accompanied by areas of shade and flashes of light, which we have transformed into a decorative pattern.

Als Garrigue werden unbebaute Böden mit einer niedrigen, stacheligen und unauffälligen Vegetation bezeichnet, auf denen grau-grüne Flecken unterbrochen von trockenen Stellen zu finden sind. Als Panorama betrachtet, ergeben sie unerwartete mimetische und unbeständige Texturen mit zahlreichen Nuancen und Hell-Dunkel-Effekten, Schattenbereichen und Lichtblitzen, die wir in ein dekoratives Muster verwandelt haben.

Si definiscono Garrigue i terreni incolti che ospitano una vegetazione bassa, spinosa e poco appariscente, che si sviluppa a macchie grigioverdi intervallate da zone aride. Osservate panoramicamente, fanno affiorare un'inattesa texture mimetica e discontinua, ricca di sfumature e chiaroscuri, zone d'ombra e lampi luminosi, che abbiamo trasformato in tema decorativo.

MAGNOLIA

Beyond appearances

The magnolia tree has lush foliage consisting of large shiny, leathery leaves that block sunrays and appear dark and impenetrable when viewed against the light.
This image offered by nature has inspired a quartz agglomerate slab with an impressive depth, sporadically interrupted and illuminated by scattered light-coloured veins.

Die Magnolie weist ein üppiges Laubwerk und große glänzende und dicke Blätter auf, die den Einfall der Sonnenstrahlen blockieren und so im Gegenlicht betrachtet dunkel und undurchlässig scheinen. Dieses der Natur entlehnte Bild hat eine Platte aus Quarz-Agglomerat mit eindrucksvoller Tiefe hervorgebracht, die sporadisch von vereinzelt hellen Äderungen durchbrochen und erhellt wird.

La magnolia ha fronde rigogliose formate da grandi foglie lucide e coriacee, che ostacolano il passaggio dei raggi solari apparendo scure e impenetrabili se osservate in controluce. Questa immagine offerta dalla natura ha suggerito una lastra in agglomerato di quarzo di suggestiva profondità, sporadicamente interrotta e illuminata da sparse venature chiare.
